Testing, Deployment and thereby completion

Executive Summary

Kaartx aims to provide an easy-to-use eCommerce platform featuring simple product browsing, purchasing, and efficient order tracking. Responsive customer support will be a priority to ensure customer satisfaction. A reliable delivery service and a strong backend system will support effective order processing and inventory management, allowing for smooth operations.

Solution Outline

We will develop the application utilizing the latest web technologies, including MongoDB, React.js, React Native, and AWS. These technologies are widely adopted, with over a million businesses leveraging them globally, and they power more than 50% of the leading active applications on the Play Store and the Internet.

Known for their ease of use, security, and scalability, these technologies will enable us to deliver a robust solution.

Upon launching your app, the web solution will provide the following capabilities:

- **User-Friendly Interface:** Ensures easy navigation for products, enhancing the overall shopping experience.
- **Real-Time Inventory Updates:** Maintains accurate stock information to prevent discrepancies and improve customer satisfaction.
- **Order Tracking Features:** Allows customers to monitor their purchases seamlessly, increasing transparency and trust.
- **Responsive Customer Support:** Provides timely assistance for inquiries and issues, fostering a positive user experience.
- **Reliable Delivery Integration:** Establishes a dependable delivery service, complemented by a robust backend system for efficient order processing and inventory management.

Kaartx Modules:

1. Front End-Customer Web/App
2. Super Admin
3. Buyer/Customer Dashboard
4. Seller Dashboard

Kaartx Front-End Functionalities

- Marketing Tools: Create promotional banners and advertisements.
- Product Import/Export: Manage products using bulk CSV uploads.
- Performance Metrics: Access seller and product performance metrics.
- Activity Logs: View all admin and seller activities for security purposes.
- Help Desk Integration: Offer customer service support via integrated help desks.

Project Costs

The table below details the costs associated with this project.

DEVELOPMENT PHASE	PRICING
Designing & Initial Invoice	INR 3,64,000/-
Development Phase, Testing & Completion	INR 3,64,000/-
Total App	INR 7,28,000/-

Any modifications or alterations to the agreed-upon project scope and objectives may incur additional fees, which will be communicated and charged to the business accordingly.

Third-party integrations, Domain, and Server

The Client is responsible for the provision and payment of all third-party integrations, including domain registration and server hosting. These services will be handled and billed separately according to the rates of the respective providers (e.g., Amazon Web Services, Godaddy, Github, SMS/ Payment Gateway, etc.).

Annual Maintenance Fees

The annual maintenance fee, excluding domain and server costs, will be 32% of the initial development cost. Charges for domain registration, server hosting, and other third-party services will be billed directly based on the pricing of the respective providers.

CONTRACT AGREEMENT FOR KAARTX MULTI-VENDOR E-COMMERCE

This Agreement is made on 15/10/2024, between Wyomin360 Global Pvt Ltd, represented by the managing director, located at Thiruvananthapuram, (from now on referred to as the "Developer"), and owner of the Kaartex Multi Vendor Ecommerce project, located at Oman, (from now on referred to as the "Client").

1. Project Description

The Developer agrees to develop the Kaartex Multi-vendor E-commerce Application, which will include the following two phases:

1. Immediate Completion (2 months)
2. Maintenance & Updation

2. Duration and Payment

The project will span a total duration of two (2) months. The team will consist of Eleven (11) resources:

- 2 React.js Developers (Web)
- 2 React Native Developers (android & iOS)
- 2 Backend Developer(node js- API connections)
- 2 Full-stack Developers (React + Node.js - scrum & MongoDB)
- 2 QA(mobile & web)
- 1 DevOps & Project Manager

The team's monthly payment will be INR 3,64,000. Therefore, the total payment for four (2) months will be INR 7,28,000.

3. Payment Schedule

- Upon signing this agreement, the client agrees to pay an advance of half of the total payment, amounting to INR 3,64,000.
- The remaining balance of INR 3,64,000 will be paid at the completion of the project.

4. Project Timeline and Milestones

The project will follow a structured timeline, with specific milestones set for each phase. Regular progress checks and updates will be provided to ensure timely completion of deliverables.

5. Developer Roles and Responsibilities

- Senior React Native Full-Stack Developer: Responsible for overseeing the project, ensuring integration and functionality meet project requirements.
- Junior React Js Full-Stack Developer: Responsible for development tasks as assigned, supporting the senior developer in achieving project milestones.

6. Deliverables

A fully functional E-commerce Multi-vendor E-commerce application covers all phases of the project.

7. Confidentiality

The Developer agrees to keep all project information confidential and not to disclose any information to third parties without the Client's consent.

8. Termination

Either party may terminate this agreement with a written notice of thirty (30) days. In case of termination, the Client will be responsible for payment of all work completed up to the termination date.

9. Governing Law

This Agreement shall be governed by and construed in accordance with the laws of the residing country.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above written.
